April 24, 2024

Reference: Formulation of Mosites #10228

As of April 24, 2024 the formulation for Mosites #10228 is changing from a 3M manufactured base to a Chemours Viton base. This change was made due to 3M getting out of the fluoroelastomer market. The new formulation made with Chemours Viton still meets the requirements for Mil-R-83248-C Type 2, Class 1, as well as AMS-7276 and AMS-3216.

Thank you for your continued interest in our products. If we can be of further assistance, please let me know.

Sincerely,

Ray Bell
